

These are complementary interactive tools.

Lens on camera simulator

<http://imaging.nikon.com/lineup/lens/simulator/index.htm>

Select lens focal length and camera (sensor FX, DX, or CX). Nikon camera or lens is not significantly different than Canon except the crop factor in DX is 1.6 for Canon vs 1.5 for Nikon. Lens focal length and angle of view are very similar.

Photographic Dynamic Range vs. ISO

<http://www.photonstopphotos.net/Charts/PDR.htm>

Select your any camera model/brand and/or several camera models for simultaneous comparison of dynamic range versus ISO
